## Internship

**Varcons Technology Pvt Ltd - Full Stack Web Development**

- Worked on a project titled Template - Photography Website. This project was aimed at creating fully-fledged functional web template(s).
- As part of the project, I designed functional web pages, used databases to collect, store, and sort data, by understanding the design briefs and client specifications that were provided in the project proposal.
- **Technical Skills:** HTML,CSS,MySQL,Python(Django)

## Projects

**Clean Laundry**

- An Android-based application and website for laundry owners to list and manage their services.
- Users can find nearby laundry shops using the app's location services.
- Users can compare service rates between different shops to find the best deal and check the status of their laundry and receive updates from the shopkeeper.
- Shopkeepers can update users and send notifications upon completion of work.
- **Technical Skills:** HTML,CSS,PHP,MySQL,Android Studio

**Online Book Store**

- An online bookstore website that acts as a central database containing various books in stock along with their title, author and cost.This website acts as a central book store.
- A user visiting the website can see a wide range of books arranged in respective categories.
- The user may select desired book and view its price. He/She may even search for specific books on the website.
- **Technical Skills:**HTML,CSS,PHP,MySQL

**Packers and Movers Management System**

- Packers and Movers is a web-based application that serves as a platform connecting service seekers and service providers in the relocation and moving industry. It facilitates communication and interaction between clients and packing and moving companies.
- The web portal offers a range of services such as household shifting, car transportation, office relocation, and commercial shifting. It caters to individuals and businesses looking for reliable and efficient packing and moving services.
- **Technical Skills:** HTML,CSS,PHP,MySQL

**Photography Website**

- Photography Website project was aimed at creating fully-fledged functional web template(s).
- As part of the project, I designed functional web pages, used databases to collect, store, and sort data, by understanding the design briefs and client specifications that were provided in the project proposal.
- **Technical Skills:** HTML,CSS,MySQL,Python(Django)

**Approach for Identifying Cyberbullying using Unsupervised Learning**

- Developed and implemented a cyberbullying detection system using Long-Short Term Memory(LSTM) unsupervised learning, achieving a 67.5% accuracy rate.
- Integrated the system with social media platforms for real-time analysis and potential removal of offensive content, contributing to a safer online environment.
- **Technical Skills:** Machine Learning, Natural Language Processing (NLP), Data Collection and Preprocessing, Model Training and Evaluation, Real-Time Analysis, Python, TensorFlow, Git
